# SPACE TO THINK BIGGER.

For workgroups that require a wide variety of output up to A3, at speed. This flexible new generation printer, with up to 1,350 sheets paper capacity, can accommodate increases in memory, especially helpful in CAD and DTP environments. Low noise, compact design and cost-effective ECOSYS technology give you more space to think about big ideas.

- 32 pages per minute in A4, 16 pages per minute in A3
- 64 MB memory standard, upgradeable to 576 MB
- PDF direct printing from USB Flash Memory devices
- · Eco-friendly, ozone-free technology
- Long-life components and easy maintenance
- · Duplex unit and network connectivity as standard

Benefit from a rare combination of talents: high quality A3 output yet small footprint and a remarkably low noise level.

Kyocera shape controlled toner makes the most of every one of the 1,200 dots per inch.

# FS-6950DN

# A3 MONOCHROME WORKGROUP PRINTER

**ECOSYS** devices are designed to minimise both direct costs

and indirect costs, such as maintenance, administration and consumables. The cartridge-free system requires only the toner to be replaced. The modular design concept allows you to add workflow-enhancing functions and a wide variety of paper handling capabilities as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

# System platform:

The FS-6950DN offers USB, parallel and network connectivity as standard and delivers problem-free system administration. Kyocera's single platform technology means that the same driver can be used for every Kyocera PCL/PostScript print device on the network; from single-user desktop printers to high-end multifunctional systems. Only Kyocera offers this effortless combination of IT sophistication and high-performance paper handling expertise.

## PRESCRIBE He

With the Kyocera page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (even multipart forms) can be created independently of the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

# KM-NET for Client/KM-NET Viewer:

The settings of all printers on the network can be checked visually and amended from any Windows® PC. KM-NET for Client enables easy setup and monitoring of the printer status via parallel, USB or network connection. KM-NET Viewer is an advanced printer management software tool using the standardized protocol SNMP.
